# Introduction

## The aim of document

The aim of this file is to help people interested in learning how to use L<sup>A</sup>T<sub>E</sub>X for drawing. In particular, already structured examples will help to develop one's own through the source code provided. The draws have been made during my research activity as PhD candidate.

The file is divided into four main chapters (parts):

- *Block Diagrams*: this part contains block diagrams;
- *Matlab Plots*: this part contains MATLAB<sup>®</sup> and the MATLAB package *matlab2tikz*<sup>1</sup>.
- *Drawing on Images*: this part contains draws made on image files;
- *Various*: this part contains several drawings that do not belong to the sections listed above.

# Chapter 1

## Block Diagram

### 1.1 Example 1

### 1.2 Example 2

## 1.3 Example 3

*Continuous-time:*

$$\begin{aligned}\dot{x}(t) &= Ax(t) + Bu(t) \\ y(t) &= Cx(t)\end{aligned}$$

*Discrete-time:*

$$\begin{aligned}x(k+1) &= Ax(k) + Bu(k) \\ y(k) &= Cx(k)\end{aligned}$$
